The birth of the Amirasolis Blessing Sphere Earth Healing

On January 19, 2024, I was woken up in the night and noticed the presence of several light beings. One of them was Amira, who has been with me for years and has shown me many new healing methods. Amira comes from the Central Sun and during the weekly channeling on my YouTube channel she always gives valuable exercises and has interesting messages for us. Together we support people in this time of great change and awakening.

They said to me that they had a mission for me. Humanity should be protected from the impending danger of another pandemic, but nature should also be healed. They then gave me instructions for building the blessing stations. They explained to me that these stations cure the soil of poisons, keep away all radiation pollution and also neutralize all poisons in the water and air.

Now the real work began. Gathering the required parts, different variants and materials were tried out.

After a series of tests with independent radiesthetes and kinesiologists and medial people who confirmed their effectiveness, these wonderful products can now see the light of day for the protection and blessing of all of us.

In order to protect as many countries as possible, we register every single bullet with its location. We can only do this together. If there is already a blessing ball in your town/city, we ask you to place your ball at your holiday destination, with friends, etc. You can also donate a ball and we will then tell you where your ball was placed. Time is short and we can only overcome this together. If you would like to find out more about the project, please watch the video "Segen für die Welt" on YouTube. A lot is explained here and you get even more information.

Energetic measures do not replace medical needs! If you believe you have a medical condition, please consult a qualified healthcare professional for a complete and correct medical diagnosis. Neither the methods listed here nor their representatives are qualified to diagnose or medically treat diseases according to earthly laws and medical aspects.
